Our History

Since 1975, McDermott Handcrafted Cues has consistently raised the industry standard for what billiard players expect from a high quality pool cue. McDermott products use the latest technology in our state-of-the-art facility, along with the finest materials in the world. In 35 years, McDermott has grown into 12 brands that lead the billiard industry in performance, quality and service.

Our Innovation

We like doing things that have never been done before. We're inspired by the thought of introducing new products and technology. Driven by the challenge to develop better performance, McDermott is dedicated to the single most important factor in new product development; your game.

Our Performance

Billiards is not an easy game. It can make your heart pound, your palms sweat and your muscles tighten. It tests your concentration, challenges your ability and tries your patience. It makes you want to come back for more. We devote all day, every day designing the best performing pool cues available.

Our Quality

Craftsmanship is a fine art. Found among the gifted artisans in Menomonee Falls, Wisconsin are the finest wood-makers, cue designers and engineers in the world. McDermott utilizes a process that includes over 150 separate procedures in the construction of each cue. All shafts start from the finest Kiln-dried, hand-selected North American Hard Rock maple and are turned 11 times for stability. All forearms, handles and sleeves are handcrafted from the finest materials and most exotic woods from around the world.

Our Involvement

McDermott has been a leader in supporting the industry through tournaments and billiard events. If it's important to our customer, it's important to us. Whether it be live events, online promotion or social networking, McDermott strives to continuously support the sport of billiards.

McDermott Brands

McDermott cues and performance shafts are some of the most recognized products in the billiard industry. Manufactured in Menomonee Falls, WI, McDermott cues are known for quality construction, exotic woods, intricate inlays and limitless custom options. Leading the industry in technology and craftsmanship with over 100 cue models ranging from \$199-\$6500, McDermott remains the top choice for all players. They are proudly made in the U.S.A. and include a lifetime warranty against warpage. Go to **page 8** for more information.

Get Noticed. Be a Star.

Star cues are designed, engineered, exclusively distributed and guaranteed for life by McDermott Cue. They feature premium maple and exotic woods mixed with intricate 4-color overlays. Manufactured globally using McDermott's technology, Star cues provide the highest quality cue in its price range. Go to **page 40** for more information on Star cues.

Feeling Lucky?

Lucky cues are designed, engineered and exclusively distributed by McDermott Cue.

Lucky cues offer a mix of premium maple cues and intricate graphic overlays. These features give you an exceptional value for one of the most solid hitting globally manufactured cues in the industry. Go to **page 48** for more information.

Ultimate Durability & Performance

Element cues feature McDermott's F2 Dual Fiber Core Technology. F2 technology utilizes carbon fiber and our resin fiber-polymer to maximize power and stability. Manufactured globally using McDermott's technology, each cue is moisture and warp-resistant. Go to **page 36** for more information.

Can You Handle the Heat?

Wildfire cues start with a premium crafted McDermott cue and then undergo McDermott's advanced wood carving and 3D rotational cutting technology; where we apply intricate artwork to the cue. You can customize your Wildfire cue with your own personalized artwork and pair it with a matching Wildfire case on **page 56**. Go to **pages 19, 23 and 31** for more information on Wildfire cues.

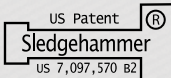

Protect your Investment

McDermott offers a complete line of billiard cases in all price ranges, colors and styles. Protect your investment with one of McDermott's premium cases. Go to **page 54** for more information McDermott cases.

Jump and Break Like a Pro

Stinger cues feature a patented tenon tip/ferrule technology which transfers the energy from your jump or break to the ball for explosive results. The exclusive phenolic tip provides a larger sweet spot for results that will sting your competition into submission. Stinger cues are globally manufactured and covered by McDermott's Lifetime Warranty. Go to **page 34** for more information on Stinger break/jump cues.

Dedicated to Breaking Balls

McDermott's exclusive break cue is engineered for one thing: breaking balls. The Sledgehammer's patented one-piece phenolic tip and ferrule has been exploding racks for years. The most recognized name in dedicated break cues performs like no other. Proudly made in the U.S.A. Go to **page 35** for more information.

The Highest Evolution in Shaft Technology

The Intimidator technology provides the most radial consistent shaft on the market which gives you the freedom to change your power and spin-rate to maximize the speed and accuracy of your shot. The i-Shaft comes in three styles engineered to maximize your power, control and feel. The i-2 comes standard on all 2012 McDermott cues over \$700. Go to **page 4** for more information.

Hardcore Performance

The McDermott G-Core shaft has taken the industry by storm. Its triple-layer design stabilizes the front impact area of the shaft, reducing vibration and minimizing shaft distortion. G-Core's carbon fiber layer increases radial consistency which enhances accuracy and stability. The G-Core shaft comes standard on all 2012 McDermott cues from \$245-\$699. Go to **page 5** for more information.

They're Back and They're Beautiful

McDermott Cue is the exclusive distributor of Elephant Balls. Elephant Balls feature unique **ELEPHANT BALLS®** designs and precision craftsmanship for perfect balance and weight. The Elephant Balls line also offers training balls and accessories to help elevate your game to the next level. Go to **page 60** for more information.

Must-Have Accessories

McDermott's Professional Series accessories offer a complete solution to all of your cue care needs. They offer the same quality as our world-class cues in a convenient package. Go to **page 62** for more information on McDermott accessories.

Made in the U.S.A.

McDermott

**More Power.
More Control.
More Feel.**

INTIMIDATOR I-SHAFTS

The Highest Evolution in Shaft Technology

i-Shaft Performance

Unlike the G-Core, the i-Shaft's carbon fiber core extends from tip to joint, stabilizing the entire shaft for absolute control and predictability. This eliminates the inconsistencies found in traditional maple shafts resulting in total control at all shot speeds.

Triple-Layer Carbon Fiber Core

- ① Unidirectional fibers
- ② High-strength composite fibers for exceptional durability and hoop-strength
- ③ Ultra-small diameter and unidirectional carbon fiber core

i-Shaft Construction

McDermott's Intimidator i-Shafts give players the freedom to change power and spin-rate to maximize the speed and accuracy of their shot. The patented i-Shaft system has identified the variable characteristics required in your game (Power, Control and Feel). Utilizing our proprietary Intimidator Carbon Energy (ICE) technology, we have designed the industry's most radial consistent shaft to help maintain accuracy at all speeds.

Tenon Tip Technology

The i-Shaft's Tenon Tip technology transfers energy from the tip into the carbon fiber core producing a solid hit that maximizes the speed and accuracy of your shot.

Kamui™ Black Tip

The Kamui™ tip consists of the highest quality Japanese pigskin leather. It has a higher porosity, allowing the tip to hold its shape and chalk more effectively. The enhanced cue ball grip results in more control and accuracy with less force.

More Control

Kamui™ tips create more ball spin with less force. Increased spin on the cue ball means increased control of your play.

More Accuracy

Kamui™ tips limit squirt and deflection by gripping the cue ball. Your shots will be more accurate.

More Chalk

Kamui™ tips hold more chalk because they have a higher porosity. More chalk means less miscues.

Less Mushroom

Kamui™ tips stabilized treated leather resists shape distortion.

G-CORE™

Hardcore Performance. Traditional Feel.

G-Core Performance

Unlike the i-Shaft, the G-Core's carbon fiber extends the first 7 inches of the shaft. This stabilizes the front-impact area of the shaft for more control. This reduces the inconsistencies found in traditional maple shafts.

Triple-Layer Design

The G-Core's triple-layer design stabilizes the front impact area of the shaft, reducing vibration and minimizing shaft distortion. The carbon fiber layer increases radial consistency, promoting enhanced accuracy and stability.

G-Core Construction

The G-Core shaft technology significantly stabilizes the shaft with a triple-layer carbon fiber core at the front impact area of the shaft. G-Core technology increases shaft stability, promoting increased accuracy with enhanced radial consistency. The G-Core also utilizes our proprietary CT Technology: a carbon fiber ferrule core that results in greater strength, efficiency and precision.

CT Technology

Carbon fiber extends through the shaft wood and into the ferrule with an additional dampening device to reduce vibration. This results in a stronger ferrule assembly with maximum impact properties and enhanced feedback.

Everest Tip by Tiger

Each Everest laminated cue tip is individually tested for consistency, hardness and quality. It shapes like a hard tip, hits like a medium, but has the control of a soft tip. Everest tips have 10-layers that include a red warning layer to indicate when it needs replacement.

Made in the U.S.A.

High-Performance Shaft Comparison

McDermott's i-Shaft and G-Core each have their own unique core construction to implement the triple-layer carbon fiber technology. The diagrams below show the carbon fiber placement in the i-Shaft and G-Core.

The i-Shaft's carbon fiber starts at the ferrule and continues through the entire shaft, making it the most radial consistent shaft on the market. This minimizes the inconsistencies experienced with an all-maple shaft. The i-Shaft also uses McDermott's Tenon Tip Technology in which the ferrule has a tenon that fits inside of the carbon fiber core.

G-CORE

The G-Core's carbon fiber starts at the tip and extends through the first 7 inches of the shaft. This gives it the accuracy and power benefits of a high-performance shaft, but with the familiar feel of a traditional all-maple shaft.

i-1 Big Boy Shaft - iB \$249

The i-1 Big Boy is the most powerful shaft in the Intimidator series. It uses a 13.25mm impregnated hard leather tip that allows it to hold contact with the cue ball longer. This makes the i-1 Big Boy ideal for breaking and jumping with extreme control.

Samsara Ultra-Hard Leather Tip

- Break/Jump Tip
- 9 layer laminated calf skin
- Ultra-hard with cue ball grip

- 13.25mm Tip
- Short Break/Jump Taper

i-2 Shaft - i2 \$249

The i-2 is known for its incredible control and consistency. It is the perfect all-around performance shaft designed for players that want maximum control without sacrificing power and finesse. The i-2 has a 12.75mm tip and comes standard on all McDermott cues \$700 and up.

Kamui™ Black Soft Tip

- High-porosity allows chalk adhesion
- High-elasticity increases grip; reducing miscues
- Excellent balance of cue ball control and spin

- 12.75mm Tip
- Pro Taper

i-3 Shaft - i3 \$249

The i-3 is performance at its highest level. It is designed for incredible spin and finesse. With a 11.75 mm tip, the i-3 is engineered for highly-skilled players who have great control of their stroke mechanics and are looking for more cue ball action.

Kamui™ Black Super Soft Tip

- Highest elasticity of the original tips
- Maximum contact time between the cue ball and tip
- Generates more spin with a lower stroke speed

- 11.75mm Tip
- European Taper

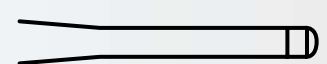

G-Core Shaft - G-CORE \$149

The G-Core is the perfect blend of technology and classic feel. It has the benefits of carbon fiber core technology with the familiar feel of a traditional maple shaft. The G-Core can be customized to any of the popular shaft diameters and comes standard on all McDermott cues \$245-\$699.

Everest Medium Tip

- Individually tested for consistency, hardness and quality
- Vacuum laminating with proprietary VACULAM™ process
- Special red layer warns when to replace the tip
- Shapes like a hard tip, hits like a medium and controls like a soft

- 13mm Tip
- Pro Taper

Tri-Core Butt Construction

Our cue construction process includes over 150 separate procedures. All forearms, handles and sleeves are handcrafted from the finest materials and most exotic woods from around the world. Our shafts are built with the finest Kiln-dried, hand-selected North American Hard Rock Maple and are turned 11 times for stability. McDermott cues come with a lifetime warranty against warpage and defects.

Throat

The throat **1** is adorned with intricate inlays and rings using the finest materials and exotic woods from around the world. All of McDermott's inlays and rings are precision milled to within .001". Each McDermott cue is customizable with over 30 premium paint and stain choices. The cues are then finished with an ultraviolet electrostatic 5-coat urethane finish.

Handle

The Tri-Core butt is constructed using three separate pieces of wood that are hand-glued and screwed to promote straightness over the life of the cue. The tenon **2** and pin **3** technology provides optimal balance for the butt of the cue. A double-pressed and sealed Irish linen or premium leather wrap **5** is applied over the underwrap **4** to provide incredible comfort and moisture control.

Sleeve

The sleeve **7** slides over the underwrap tenon **6** to complete the Tri-Core butt construction. It is glued and secured by the butt plate and interchangeable weight bolt system **8** before being adorned with intricate inlays and rings to compliment the design of the throat. All McDermott cues are capped with a clover-embossed rubber bumper **10** to protect the butt plate **9**.

The Wood

McDermott hand selects only the finest woods from around the globe. The wood is aged for 18 to 24 months by alternately storing and machining

each piece three times. This allows the perfect amount of moisture to escape, ensuring absolute straightness.

The Joint

McDermott's signature 3/8"-10 wood-to-wood and patented Quick Release (QR) joints provide consistent surface contact throughout the cue, delivering maximum feel and the most solid hit in the industry.

The Finish

McDermott cues are hand-stained with our exclusive imported European "Organic-Pigment" stain made from the finest pigments in the world. Superior to the synthetic stains generally used in the industry, it's notable for uniform saturation of the wood and color consistency. Five coats of high-luster urethane protect the cue and enhance the color.

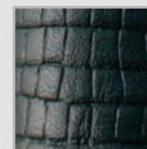

The Wrap

GENUINE IRISH LINEN

Our genuine imported Irish linen wrap is tightly wound, double-pressed and polished for a perfect fit and smooth feel. The Irish linen absorbs hand moisture to ensure a comfortable grip.

PREMIUM ITALIAN LEATHER

Our premium Italian leather wraps offer the durability, consistency and comfort that can only be found in leather.

Made in the U.S.A.

Gallery Collection

Here at McDermott we understand what it takes to manufacture a top quality performance pool cue. We also have a deep passion for creating some of the world's most respected and sought after custom cues. Our Gallery Collection celebrates the originality of custom, investment-grade collectible cues. Each cue is a work of art. These cues showcase our craftsmanship, creativity and desire to build the finest cues using the most exotic materials from around the world. The Gallery Collection has three series that are categorized by their edition size.

Masterpiece

Edition Size: 1-10

It takes a true work of art to be called a masterpiece. McDermott's Masterpiece cues live up to the name. Made by the most gifted cue artisans in the world, the Masterpiece cues define the next generation of American art. These unique cues are adorned with over 200 inlays made with the rarest materials in the world like real ivory, gemstone inlays and precious metals. The small edition size makes them the most collectible McDermott cues on the market. Masterpiece cues come with a McDermott Certificate of Authenticity.

Showcase

Edition Size: 11-50

McDermott's Showcase cues are painstakingly handcrafted with the finest woods and exotic materials. Precision detailing and intricate inlays result in a true work of art. Each cue exhibits McDermott's passion for building custom cues that are not only worthy of being on display at a museum, but built with same technology to run the table. Showcase cues come with a McDermott Certificate of Authenticity.

Limited

Edition Size: 51-250

McDermott's Limited cues offer the outstanding performance, precision inlays and exceptional craftsmanship expected from a McDermott. They possess the beauty and elegance that far exceeds the standard of high end custom cues. These cues are highly sought after by collectors and cue aficionados. Limited cues come with a McDermott Certificate of Authenticity.

Intimidator

The Intimidator is the most expensive pool cue in the world and raises the bar to a whole new level of prestige. This sensational cue is a three-dimensional piece of art that features four bladed wings that can rip a table to shreds. The focal point is a Genuine Italian Obsidian Gemstone Sphere. Our designers started out with a 82-pound solid piece of stainless steel. After finely machining this piece for over a year, the result was an amazing 9½ pound masterpiece.

Cue Specifications

- Total hours to create: 1,862 hours of hand engraving, hand etching and hand machining
- Overall length: 63" from Obsidian Sphere to leather tip
- Weight: 9½ pounds
- Wingspan of large blade: 9"
- Winged blades: inlaid with 24K Gold, Deep Relief, French Grey Scroll Engraving
- Butt Construction: 46 individual parts, including Genuine Italian Obsidian
- Inlays: over 210 separate inlays, including 112 hand polished Precious Metal inlays on the handle
- Exposed Blade: 48" on the large blades; 13" on the smaller blades

MSRP: \$150,000

Interested in buying the Intimidator? Call 1-800-666-2283 or visit mcdermottcue.com/intimidator for more information.

McDermott

Jim McDermott Cue of the Year

Legendary cues
inspired by a
cuemaking legend.

For his outstanding contributions to the cuemaking art and industry, Jim McDermott has been elected into the International Cuemakers Hall of Fame. Every year, the Jim McDermott Cue of the Year raises the bar of excellence in custom pool cues. The Cue of the Year uses the rarest materials from around the world that are combined with exotic woods that have been in McDermott's Private Reserve Wood Collection for over 20 years. Featured in the Showcase and Limited Series, the Jim McDermott Cue of the Year is known for selling out fast. The Showcase Special Edition Cue of the Year typically sells out within days of being released. These cues are highly sought after by cue collectors and come with a McDermott Certificate of Authenticity which is personally signed by Jim McDermott.

Two FEATHER

Anthony "Two Feather" Squadroni has been designing pool cues for 20 years. Many of his award winning cue designs have been featured in publications and shows internationally. Two Feather's work is inspired by his native American heritage and his love for the game of billiards. McDermott is proud to have worked with Two Feather on McDermott's three shaft inlay cues featured on pages 15-17. These unique cue designs feature intricate inlays on the shaft to compliment the cue design, while giving you the quality craftsmanship and performance guaranteed by McDermott.

Traditional All-Maple

The Traditional cues feature McDermott's classic all-maple standard shaft. Dedicated to the players who have built their game around the hit and feel of McDermott's all-maple shaft. The cues are complimented by the simplicity of the maple butt, enhanced with McDermott's premium stain and finishing process. GS07-GS12 feature our unique "double-wash" stain process which accentuates the Birdseye maple and stunning wood grain.

McDermott

Three Ways To Custom Build Your Cue

Option 1: McDermott Traditional

Start with a blank McDermott cue... your canvas. Decide what you want and how you want it. It doesn't get more custom than that. The combinations are nearly endless! What will YOUR cue look like? Do you think you've got what it takes to design your own cue.

1. Pick your color.
 2. Choose your wrap.
 3. Adjust your weight.
 4. Specify your tip diameter.
 5. Choose your joint.
 6. Engrave your butt plate.
 7. Add your cue transfer art.
- McDermott Traditional cue with maple shaft comes with your choice of paint or stain color and Irish linen wrap: **\$225**
 - McDermott Traditional cue with G-Core shaft: **\$375**
 - McDermott Traditional cue with i-Shaft: **\$475**
 - Leather wrap: **+\$60**
 - Quick Release joint: **+\$125**
 - Engraving: **+\$20**
 - Add artwork: **+\$25 for each transfer**

Standard McDermott Paints

Standard McDermott Stains

Double Wash and Custom Mixed Colors

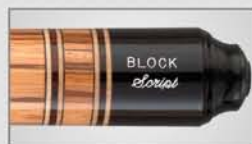

Genuine Irish Linen Wraps

Leather Options: Add \$60 (Actual leather texture and color may vary.)

Joint Options

Color Disclaimer: The beauty of wood lies in its natural irregularities. The color of wood and the stain applied to wood is affected by many factors outside of the control of McDermott Cue including, but not limited to, type of wood, color of wood, grain pattern or figure, wood density, mineral marks in the wood, and the staining application process. Every monitor and printer displays colors differently, therefore samples shown online or in print are for basic comparison purposes only and should not be used as exact references. By choosing wood you are accepting the natural and acceptable differences in color.

Add Artwork

Add transfer artwork to the forearm and sleeve of your custom cue. See page 32 for transfer art options and instructions on how to submit your own original work. Add \$25 for each transfer.

Option 2: Custom Transfer Artwork

Send us your own original artwork or graphics and we can apply it to any white pearl cue. Custom transfers can only be applied to white pearl painted cues.

Dimensions

Forearm: 10" x 2.25" @ 300dpi

Sleeve: 2.25" x 3.75" @ 300dpi

Original artwork is subject to a \$75 fee. Files must be supplied electronically as JPG or TIF format at high-resolution. Email files to sales@mcdermottcue.com

Option 3: Select Exotic Inlay Materials

Do you think one of our cues would look better with bocote instead of cocobolo; green burl instead of turquoise; pewter instead of brass? Are you looking to have a cue built that's totally unique to you? Now you can. You call the shots. You choose the materials. You make it yours. Custom pick from McDermott's extensive list of exotic woods and materials to custom build a cue that is exclusive to you.

- Select any McDermott catalog cue: **Price Listed**
- Custom inlay materials: **+\$300***

*Pewter, brass and abalone are subject to higher fees, contact a McDermott Sales Representative for an estimate.

Sting the competition into submission!

STINGER

- **Break Harder • Shoot More Accurately**
- **Jump Easier • Play With More Control**

Patented Tip/Ferrule Technology

Patented Tip/Ferrule Technology

The tip features a "stinger" stem that projects downward through a hole in the center of the ferrule. On impact, the shock of the hit goes to the center of the tip and down the stinger stem, transmitting the impact directly to the center of the shaft. This results in a very efficient, precise hit.

The Enormous "Sweet Spot"

The Stinger technology takes the hit energy to the center of the shaft, regardless of where you hit the tip. Our tip can be shaped flatter than a typical break cue's tip. The flatter profile causes the Stinger tip to have a huge "sweet spot." You can mishit and still get the result you intended.

- McDermott jump handle's lightweight design is perfect for your close jump shots!
- 3/8"-10 joint • 13.75" total length

US Patent 
Sledgehammer
US 7,097,570 B2

Dedicated to Breaking Balls

Sledgehammer is one of the most recognized and respected names in dedicated break cues. The patented one-piece phenolic tip and ferrule transfers energy unlike any other tip on the market. This gives you insane power and superior accuracy. Known to many as the hardest and most solid hitting break cue on the market, the Sledgehammer simply destroys a rack leaving your competition speechless.

Patented One-Piece Phenolic Tip/Ferrule

Made in the U.S.A.

Sledgehammer cues are covered by McDermott's Lifetime warranty, including warpage.

element™

F2 DUAL FIBER CORE

Element's F2 Dual Fiber Core technology utilizes multiple strands of thin carbon fiber, overlapped and reinforced with our resin fiber-polymer. This combination makes them incredibly strong for their weight, while resisting warpage and moisture. The high strength-to-weight ratio provides optimal balance while maximizing the power and stability of your stroke.

Element's stainless steel butt plate provides ultimate durability and features an optional adjustable weight system to quickly and easily customize the cue's weight.

Element's 3/8"-10 stainless steel joint pin provides ultimate surface-to-surface contact between the butt and shaft for a solid hit.

Element shafts utilize F2 technology and is coated with a special polymer for a low resistance smooth finish.

Evo Soft Touch Grip

Smart Micro Nano Technology is a description of activities at the level of atoms and molecules that have application in the real world. A nanometer is a billionth of a meter, which is about 1/800000 of the diameter of human hair. Nano Technology, when used in grips, changes the cell construction which instantly improves the feel and playability.

EZ Shot Cue Ball EB-EZ \$20

The fastest, most efficient way to develop, analyze and improve your game. The EZ Shot Cue Ball™ reinforces good fundamentals to lead you to consistent performance and rapid improvement. Each shot give you instant visual feedback. For beginning to advanced level players. Includes a 20 page easy-to-use instructional booklet.

Elephant Practice Balls EB-PB \$40

Elephant Practice Balls™ provide immediate visual feedback on every shot, by showing how the balls are rolling, spinning and sliding. These patented balls reveal the effects of english and are ideal for understanding how your stroke can affect the balls' performance. Designed for beginning to advanced level players, each set includes a 32 page easy-to-follow instructional booklet.

Ghostball Aim Trainer EB-GAT \$15

Elephant Ghostball Aim Trainer™ helps to improve focus and aiming points. It takes the confusion out of position play so you can better place the cue ball for your next shot. Designed for beginner to advanced level players, the Ghostball Aim Trainer gives instant visual feedback so you can improve your game. It comes with a 12-page easy-to-use instructional booklet.

Pool Prodigy

Professional Pool Cues Designed Especially for Children

Prodigy cues are great for...

- kids who want proper equipment
- players who demand quality and performance
- pool table owners with small rooms or obstacles

Keith O'Dell, Jr. - Pool Prodigy

Keith O'Dell, Jr. is McDermott's youngest sponsored player. At 2 years old, he took the internet by storm and hasn't stopped. He's been featured internationally on network news and talk shows including *Good Morning America*, *Rachel Ray*, *Fox News* and *The Today Show*. We wish Keith a long successful career!

McDermott Lifetime Warranty

McDermott's Lifetime Warranty applies only to the original purchaser/owner of the cue and must be purchased from an authorized McDermott dealer. McDermott Cue warrants its pool cues to be free of defects in material and workmanship, including warpage, for as long as the product is owned by the original purchaser/owner. McDermott does not warrant its product against:

- normal wear and tear including tip, finish, and wrap;
- misuse, abuse or mishandling;
- modification or improper maintenance performed by third parties or
- damage caused by exposure to extreme temperature or humidity.

All warranty claims must include the complete cue and are subject to evaluation at our facility prior to approval. Products that do not qualify for the McDermott Lifetime Warranty can be serviced by McDermott for a fee. To obtain warranty service on a McDermott product, return the product to an authorized McDermott dealer or directly to McDermott along with a copy of your original sales receipt. For complete warranty claim instructions or to find an authorized McDermott dealer, visit www.mcdermottcue.com.

DISCLAIMER: This warranty is in lieu of all other express warranties. McDermott disclaims all warranties for products that are purchased from sellers other than authorized retailers or distributors. McDermott's warranty against warpage was introduced in 2004. Cues manufactured prior to 2004 do not qualify.

McDermott Lifetime Maintenance

Maintenance is one of many hidden costs to consider when you're looking at a cue's price. Fortunately, McDermott offers the most comprehensive maintenance program ever. Just about anything your McDermott cue might need replaced, checked or cleaned is covered under our exclusive Lifetime Maintenance program for life. This will save you money. McDermott's total commitment to your satisfaction doesn't end when you take your new McDermott home. It only begins there.

10 Point Inspection Process

McDermott craftsmen check for details even the most careful player may not notice. Joints are checked, cosmetics evaluated, weights adjusted, and every minor detail inspected.

- | | |
|-------------------------------|---------------------------------|
| 1. Check structural integrity | 6. Replace tip |
| 2. Resand shaft | 7. Adjust weight |
| 3. Clean shaft | 8. Clean butt |
| 4. Refinish shaft | 9. Redress wrap |
| 5. Clean ferrule | 10. Overall cosmetic evaluation |
